Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Mathematical Books Published in September

Moore's Logarithmic Reduction Tables
PRICE, $1.00.

In writing this book the aim of the author has been to supply students of analytical chemistry with accurate tables, covering gravimetric, volumetric, and gas analysis, for which they have constant use.

Longley's Tables and Formulas
PRICE, $ .50.

The numerical tables in this volume are those which have been found by experience to be most useful in performing the calculations necessary for careful plotting of various algebraic and transcendental curves in rectangular and polar coördinates (including parametric representation), for the approximate solution of equations, particularly transcendental equations, and for many types of problems in calculus and mechanics.

Barker's Computing Tables and Mathematical Formulas
PRICE, $ .75.

This is intended for high schools, especially in connection with solid geometry and trigonometry work. It is convenient in form, moderate in price, has a wide range of service, and is carefully arranged for easy references.

Calfee's Rural Arithmetic
PRICE, $ .30.

The purpose of this book is to put life and meaning into arithmetic for pupils of the seventh and eighth grades and for rural teachers. It contains many valuable features.

Correspondence is cordially invited and will receive careful attention.
